

Which Artists' Albums and Tracks Share a Title?

Among artists with an album that shares a track title, the majority only have one such album. The major outlier in this category is Iron Maiden which has seven albums that share a title with a track.

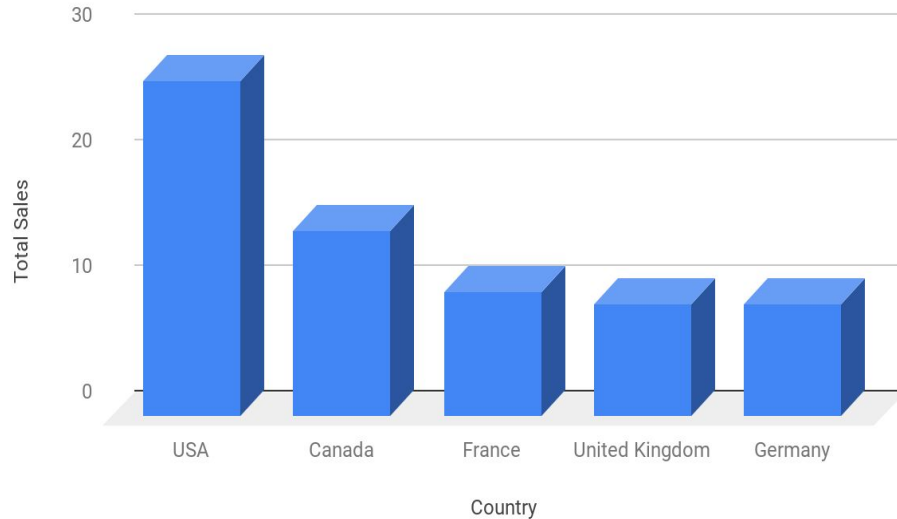

What is the Average Track Length for each Genre?

The Comedy, Drama, Sci-Fi & Fantasy, Science Fiction, and TV Shows genres all have average track lengths that are significantly longer than the traditional musical genres. However, some of the traditional musical genres may not be well represented by the data, such as Rock and Rock and Roll which may overlap, but have both one of the longest and shortest average track lengths of the traditional music genres.

Which are the Top 5 Countries in Sales for Metallica?

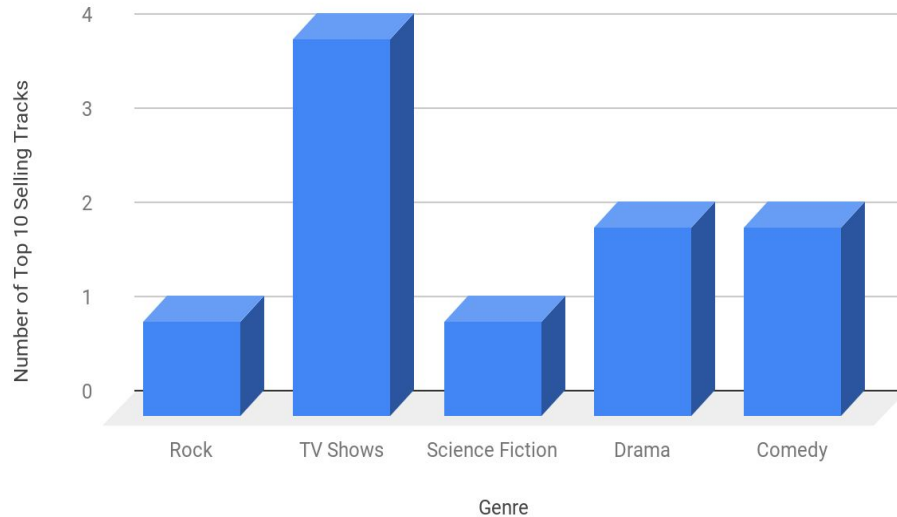

Top 5 Countries in Sales for Metallica

The USA is the top sales country for Metallica with nearly twice the sales of the second best selling country, Canada. While the difference is large in the North American market, the three European countries in the top five produce similar total sales to each other.

Which Genres are Represented in the Top 10 Selling Tracks?

Top 10 Selling Tracks By Genre

TV Shows are the most popular genre in the top 10 selling tracks making up 40% of the list. Interestingly, only one traditional music genre, Rock, made it into the top 10 with only one track.
